DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 3-7, 13-14, 17, 23-25, 29, drawn to a crosslinked optically active three-dimensional polymer network (claims 1 and 3-7); a method to prepare a polymer network (claims 13-14); an optically active support material (claim 17); a method to purify a mixture of at least two constituents (claims 23-25); a method of asymmetric synthesis (claim 29).

Group II, claims 2, 8-12, 15-16, 18-22, 26-28, and 30, drawn to a crosslinked optically active three-dimensional polymer network (claims 2 and 8-12); a method to prepare a polymer network (claims 15-16); a support material (claims 18-22); a method to purify a mixture of at least two constituents (26-28); a method of asymmetric synthesis (claim 30).

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I comprises a polymer network containing homochiral units of the first selector and homochiral units of the second selector while Group II comprises a polymer network containing homochiral units of the first selector, homochiral units of the second selector, and homochiral units of the third selector. Thus, Group I and II do not contain the single general inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
